- Time Management
- Critical Thinking

TECHNICAL SKILLS

- Languages: HTML5, CSS3, JavaScript (ES6+), PHP, Node.js
- Frontend: React.js
- Backend: PHP, Node.js, MySQL
- Tools: VS Code, Git, GitHub, Figma

PROFILE

Results-driven Frontend Developer with 4+ years of experience on client-based projects focusing on high-performance, responsive UIs using React.js and ES6+. While my core expertise is crafting clean, maintainable frontend architecture, my foundational knowledge in PHP, Node.js, and MySQL ensures seamless integration with data-driven backends. Proven track record of translating complex client requirements into scalable web solutions.

EXPERIENCE

Developer - Dishora (Capstone)

2024 - 2025

Frontend-Focused Web Developer

- Developed "Dishora," a food ordering system for local SMEs in Naga City, focusing on responsive and interactive user interfaces using React.js and modern JavaScript (ES6+).
- Collaborated on UI design and prototyping using Figma and GitHub for version control.

Freelancer

2022 - PRESENT

Frontend Developer

- Delivered high-performance, responsive UIs for diverse client-based projects using React.js, JavaScript (ES6+), HTML5, and CSS3, maximizing user engagement and cross-device compatibility.
- Integrated frontend architectures seamlessly with data-driven backends utilizing PHP, Node.js, and MySQL to implement robust, functional features while maintaining an optimal user experience.
- Translated complex client requirements into scalable web solutions, prioritizing clean, maintainable code structures and a track record of reliable project delivery.

PROJECTS

Naga Parochial School Election System

Tech Stack: JavaScript ES6+, React, Node.js, MySQL

- Developed a real-time Election System for Naga Parochial School using React.js, as frontend framework and Node.js as a backend. Built interactive voting features and candidate dashboards with a focus on seamless navigation and UI.

XTech Car Rental

Tech Stack: JavaScript ES6+, React, PHP, MySQL

- Built a vehicle reservation platform using PHP and JavaScript that automates booking calculations based on duration and vehicle type. Implemented an admin portal with full CRUD capabilities to manage fleet availability and customer reservations efficiently.
